

Press release

ALPI Deutschland GmbH

IGE+XAO Software Vertriebs GmbH

IGE+XAO

GROUP

On the occasion of the Hannover Fair IGE+XAO and ALPI

announce collaboration in Germany

March 31st, 2021

Newly developed gateway between software solutions offers new functionalities for customers of both companies

- ▶ New offers are about to be launched soon
- ▶ ALPI customers can complement their planning with all-pole circuit diagrams
- ▶ Customers of IGE+XAO can benefit from standard-compliant electrical calculations in low-voltage along with automated documentation
- ▶ Hannover Messe offers virtual meetings to get information from 12.-16 April, 2021

Mönchengladbach / Viernheim - IGE+XAO and ALPI are combining their strengths in Germany. The French parent companies had already announced their future cooperation in October last year. Now, IGE+XAO Software GmbH and ALPI Deutschland GmbH have also announced that they will coordinate closely on the German-speaking market for electrical planning solutions. Published on the occasion of the Hannover Fair from April 12-16, 2021 where both companies will have a virtual presence.

At the heart of the cooperation is a newly developed gateway that connects the solutions from ALPI and IGE+XAO. This new development ensures the seamless exchange of planning data between the solutions of the two providers. Allowing both companies to technically link their software portfolios with each other and to put together new, highly interesting software packages for their customers, who then have an even wider range of other important functions for automated electrical design at their disposal.

In practice, ALPI customers can add multi-line circuit diagrams to their planning. Or customers of IGE-XAO additionally benefit from standard-compliant electrical calculations in low-voltage along with automated documentation.

New customers from the design, manufacturing and production sectors will also be able to choose from appropriately equipped solution packages.

The market launch of the new offers will be announced in the coming weeks. Interested visitors of the Hannover fair can use the opportunity and speak with contact persons from both companies about the new cooperation and the upcoming solutions.

Virtual appointments can be booked on this page under *Contact persons*:

About the IGE+XAO Group

For over 34 years, the IGE+XAO Group has been a software publisher designing, producing, selling and supporting a range of Computer Aided Design (CAD), Product Lifecycle Management (PLM) and Simulation software dedicated to Electrical Engineering. These software products have been designed to help companies in the design and maintenance of the electrical part of any type of installation. This type of CAD/PLM/Simulation is called "Electrical CAD/PLM/Simulation".

In Germany IGE+XAO is represented with two sites in Mönchengladbach and Rastatt. The company employs more than 370 people around the world in 31 sites and in 20 countries. With more than 93,000 licenses distributed around the world and over 43 000 customers IGE+XAO is a key player in the field of E-CAD solutions.

About ALPI

Founded in 1986, ALPI is specialized in the development of innovative software for the design of low voltage and high voltage electrical installations. The main software suite Caneco ONE includes calculation, sizing, schematics and costing to enable users to manage and operate a complete project. Backed by 35 years of experience in solutions and services for electrical engineering, ALPI is a European leader in automated calculation software for LV electrical installations. The solutions include catalogues of all relevant electrical equipment manufacturers and optimize installation and operating costs while being in compliance with the current applicable inter-/national standards. As official industry partner of Autodesk ALPI offers planning solutions in 2D/3D (Caneco Implantation) on the platform AutoCAD® as well as a Revit® application for the design and control of a digital electrical model (Caneco BIM). A team of engineers and technicians support its customers professionally with additional services which include training courses, technical support and electrical engineering services. The company employs over 100 people in four countries.
